

MONTANA LEGISLATIVE BRANCH

Legislative Fiscal Division

Room 110 Capitol Building * P.O. Box 201711 * Helena, MT 59620-1711 * (406) 444-2986 * FAX (406) 444-3036

Director
AMY CARLSON

DATE: June 17, 2016
TO: Senator Duane Ankney
FROM: Nick VanBrown and Sam Schaefer, LFD
RE: Direct tax impacts of closing Colstrip units 1 and 2

This analysis provides information on the direct tax impacts of closing Colstrip units 1 & 2. It does not analyze the indirect effects of these units closure such as other electrical generation coming online or the loss of service jobs in the Colstrip area. This paper is divided into impacted tax types that the Legislative Fiscal Division tracks at a statewide level, along with the corresponding local impacts. However, due to confidentiality for the owners of units 1 & 2, the corporation tax effect was not estimated in this analysis. The analysis results found that combined state and local tax reductions from the closure amount to \$17.1 million when compared to the FY 2015 baseline. In addition, general fund tax reductions amount to \$7.2 million when compared to the FY 2015 baseline.

The Colstrip power plant has a generation capacity of 2094 MW. Colstrip units 1 and 2 each have a capacity of 307 MW, totaling 614 MW or 29% of the plants total generating capacity. For the purposes of this analysis, it was assumed that 29% of the total electrical generation, transmission, and coal mined at the Rosebud mine would be lost. It was also assumed that 29% of the workforce at the Colstrip facility and the Rosebud mine would be lost.

Coal Severance Tax

Current estimates show that if units 1 and 2 closed, coal severance tax collections would decrease by \$3.9 million. Of this amount, \$1.0 million would have went to the state's general fund while the remainder would have been deposited into a variety of state special revenue funds and trust funds. The total coal severance tax impact is shown in the table below.

Coal Severance Tax Impacts	Amount
General Fund	\$1,045,480
Coal Trust Principle	\$1,981,620
Long-range Building Program	\$475,589
Coal Natural Resource Account	\$114,934
Shared Account (Agriculture, Conservation Districts, Library)	\$216,393
State Parks Trust Principle	\$50,333
Renewable Resource Debt Service	\$37,658
Cultural Trust Principle	\$24,968
Coal Severance Tax Total Impact	\$3,946,975

U.S. Mineral Royalties

Decreased mining activity will also impact revenues that the state receives from U.S. mineral royalties. Less activity at the Rosebud mine would cause an estimated decrease in U.S. mineral royalty collections of \$1.1 million. Of this \$1.1 million, the general fund may lose \$0.8 million while the mineral impact fund which would be distributed to counties may see a loss of the remaining \$0.3 million.

Electrical Generation & Transmission

The state of Montana has a tax on both electrical generation and transmission. These taxes are currently deposited into the state's general fund. Closures of plants 1 and 2 are estimated to decrease electrical generation taxes by \$0.8 million and wholesale transmission taxes by \$0.6 million.

Individual Income Tax

Under the assumption that 29% of the workforce would be lost, individual income taxes to the general fund would decrease. Using the Quarterly Census of Employment and Wages (QCEW) data, an average salary of \$75,000 was used for workers that would lose employment. Using these data and assumptions, the effect on the general fund may be a decrease of \$0.8 million.

Coal Gross Proceeds

State and local governments do not levy or assess any mills against the reported gross proceeds of coal. Instead, a flat tax is levied against the reported gross proceeds of coal mines. This tax contributes to the state's general fund, local governments, and the 6-mill levy. Closure of units 1 and 2 could decrease the general fund portion by \$1.1 million, the local government portion by \$1.0 million, and the 6-mill revenue by \$0.2 million.

RIGWA

The state imposes a resource indemnity and ground water assessment (RIGWA) tax on the gross value of coal. This tax contributes to multiple natural resource and environmental quality state special revenue accounts and may decrease by approximately \$0.1 million if units 1 and 2 closed.

Property Tax

The following numbers represent the loss in tax dollars to various entities based on TY 2015 taxable values and mill rates. These numbers split the known taxable value and mill rates of the power plant property into units using company ownership percentages. A comparatively small amount of additional taxable value in non-telecom and non-pipeline property in class 9 electrical utilities, class 5 pollution control equipment, and class 13 telecom and electrical generation is proportioned out based on unit production capacity and simply split between county mills for Rosebud County.

Additionally, the combined taxable value for class 9, electrical transmission property, for Portland General Electric, Puget Sound Energy, PacifiCorp, and Avista Corporation, the majority owners of the transmission line from the Colstrip plant, was reduced proportional to the megawatt hour reduction from units 1 & 2. These transmission lines are what cause the property tax reduction outside Rosebud County. There is a level of uncertainty, especially with other counties, as the transmission lines are centrally assessed.

	Rosebud Total	All Other Counties	Total
State	\$1,484,058	\$631,006	\$2,115,064
City	\$826,567	\$852	\$827,419
Countywide	\$565,852	\$904,353	\$1,470,205
Countywide Education	\$329,872	\$262,380	\$592,252
Local Elementary	\$296,518	\$397,212	\$693,730
Local High School	\$285,497	\$734,740	\$1,020,237
Roads	\$54,562	\$179,980	\$234,542
All Other	\$512,220	\$46,130	\$558,350
	\$4,355,146	\$3,156,653	\$7,511,799
